

Course Resources

A PDF version of each module is available for your reference.

[Module 1: Connectivity options](#)

[Module 2: Cloud VPN](#)

Congratulations! This completes the Networking in Google Cloud course series.

Additional Resources

Generative AI and large language models are proving to be powerful tools. Google even has its own generative AI tool, Gemini. Examining the power and usefulness of generative AI is beyond the scope of this course, but if you are interested in learning to leverage its capabilities, Google Cloud has a free micro course on using generative AI tools. In this course we cover the architecture of Large Language Models as well as recommended practices when implementing these technologies.
