

BUZABRICI-FILIPESCU ROBERT

Senior Embedded C/C++ Developer | Automotive | CANoe | AUTOSAR

Iasi, Romania | filipescurobert@gmail.com | 0760 827 250 | <https://www.linkedin.com/in/robertfilipescu/>
Languages: Romanian (native), English (C2), German (A2)

PROFILE

Embedded C/C++ developer with 13+ years of experience delivering automotive and space-grade software for instrument clusters, diagnostics, CAN-based communication, AUTOSAR-oriented platforms, and real-time embedded systems. Hands-on background in feature implementation, debugging, integration, validation, and low-level optimization across projects for Daimler, Ford, Renault, Volkswagen, Porsche, and Audi. Strong with CANoe, CAPL, Trace32, Git, Jenkins, and ISO 26262 / ASPICE-driven environments.

TECHNICAL SKILLS

- **Core stack:** Embedded C, ANSI C, C++, CAN, CAPL, CANoe, CANalyzer, Trace32, Git, Jenkins
- **Platform & Tools:** EB tresos, Linux, Xilinx SDK, Zynq-7000 SoC, ARM Cortex-A9, VectorCast, Google Test, Jira, Confluence
- **Domain focus:** Automotive embedded development, instrument cluster, diagnostics, AUTOSAR-oriented platforms, IPC, real-time systems
- **Standards:** ISO 26262, ASPICE, V-Cycle, Agile/SCRUM, UML, MagicDraw, requirements traceability

PROFESSIONAL EXPERIENCE

Capgemini Engineering | Iasi, Romania

Senior Embedded Software Engineer / Tech Lead Replacement | April 2022 – November 2025

- Optimized embedded modules, improving memory footprint and system responsiveness for OEM integration.
- Refined CAPL scripts and validation campaigns, increasing test coverage and reducing post-release bugs.
- Delivered consistent coding output in Git while maintaining coding standard compliance and lowering debugging effort.
- Supported technical continuity as Tech Lead replacement, unblocking development issues and mentoring team members.

ENEA Software Development Services | Iasi, Romania

Senior Embedded Software Engineer – Space Platforms | April 2021 – April 2022

- Developed space-grade C/C++ modules focused on reliability, fault tolerance, and real-time behavior.
- Engineered a SpaceWire driver interface and state machine for RendezVous Sensor telecommand processing.

- Optimized constrained embedded environments using Xilinx SDK and Zynq-7000 SoC (ARM Cortex-A9).

Visteon Electronics EOOD (via RINF.TECH) | Sofia, Bulgaria

Senior Embedded Software Engineer – Automotive Platforms | June 2014 – May 2020

- Implemented and integrated instrument cluster software in C/C++ for Daimler programs including VS Daimler 2.0, MFA2, and MRA2.
- Validated display components and HMI behavior with CANoe for speedometer, tachometer, odometer, and related cluster features.
- Enforced IPC flows and Franca IDL artifacts to support communication between Application Layer and HMI in AUTOSAR-oriented environments.

Continental Automotive Romania SRL | Iași, Romania

Embedded Software Engineer | August 2010 – May 2014

- Applied customer-specific C/C++ functionalities for Ford, Renault, VW, Porsche, and Audi platforms.
- Configured diagnostics behavior including DTCs, freeze frames, failure reactions, and CAN diagnostic instances.
- Performed unit and integration testing and worked within ISO 26262-driven powertrain environments.

EDUCATION

- Master's Degree, Telecommunication Networks | (2009 - 2011)
- Bachelor's Degree, Information Technology | (2005 - 2009)
- Bachelor's Degree, Economics and Management | (2007 - 2010)

CERTIFICATIONS

- Capgemini L2 Automotive Industry Certification
- Vector Certified Embedded Associate
